

Salute on the site of architecture studio “**UNIVERSUM**” which was made by an architect, **Nino Okuashvili**, in 2009.

We are making design and architecture, interior and decor, also reconstruction of buildings and landscape design; but projecting - it is the most difficult and polyhedral sphere of our business. Unlimited fantasy and

reality of construction combine to each other. We project small houses and big cottages in countryside, apartments and offices, parking, trade and business centers, clubs, cafes, bar-rooms, restaurant and hotels of any class with the same success. We consider that advantages of projects are to include customer as “partner” in every stage of construction and project. The customers, as active participants of our creative process, comprehend the methodology of our work before that our project becomes real. The main task of our office is to realize demands and wishes of our customers effective and maximally in short terms with individual style and unique expression.

From intention to realization!
